

Food Allergen Test Kits and Instruments

Food allergens are proteins in food which can trigger allergic, sometimes even life-threatening reactions in sensitized individuals. Managing food allergies usually means completely eliminating the allergenic proteins from one's diet, **requiring strict traceability throughout the food production process** from raw materials to the final product.

We provide the most comprehensive offering for food allergen rapid testing, including test kits, easy to use instruments, trainings and services, to suit your actual capabilities and needs.

SENSISpec ELISA Kits

Full range of food allergen ELISA test kits which quickly and reliably detect the presence of potential allergens caused by cross-contaminations.

Automation and Services

The BOLT™ and ThunderBolt® ELISA analyzers provide automation for the SENSISpec Allergen ELISA kits, whilst the Rapidscan LFD reader is designed for rapid field and in-process lateral flow testing. Services include maintenance and support, trainings, method development and validation.

SENSIStrip Lateral Flow Tests

Lateral flow assays are sensitive and easy-to-use tools, well suited for fast in-process sampling at different stages of the food manufacturing process.

Discover our new **PowerLine portfolio** to eliminate false negatives due to the hook effect (excess of allergens).

DNAllergen RT-PCR Kits

Our new range of RT-PCR kits allow the detection of some specific allergens and show no cross-reactivity with related species.

SENSISpec Allergen Detection ELISA Kits

Comprehensive ELISA test kit portfolio with in-house automation solution to simplify rapid allergen testing.

- Quick and sensitive method (low limits of detection)
- Validated protocols for ELISA robots
- Quantitative results, ready-to-use reagents
- High stability, accuracy and reproducibility
- Incubation at room temperature
- Minimum shelf life of 13 months

** High sensitivity for pre treated samples; detects Total Soy Protein (not only the Soy Trypsin Inhibitor)

DNAllergen RT-PCR Kits

The RT-PCR kits complete our allergen offer with molecular testing method. This technique enables the detection of some specific allergens which are not easy to identify by immunoassays (e.g. celery), and show no cross-reactivity with related species (e.g. mustard and rapeseed).

- Compatible with all kinds of cyclers on the market
- Cost-effective product with 50 reaction formats per kit
- Detection of some specific allergens and no cross-reactivity; higher sensitivity

SENSISpec Gluten Detection ELISA Kits

Gluten intolerance is characterized by adverse reactions to gluten, a group of proteins found in wheat, barley and rye. People with celiac disease or gluten sensitivity need to avoid gluten containing foods that trigger symptoms. **The European Directive 2007/68/CE assures the adequate labelling of foodstuffs, stating the ingredients that cause allergies and food intolerance, including gluten.** This legislation implies a strict control by the food industry and the traceability of the food production process, from raw material to final product.

In order to comply with this objective, the food industry requires adequate tools to monitor their entire process in a quick and reliable manner.

We offer a comprehensive range of gluten detection kits using **the R5 monoclonal antibody.**

The SENSISpec INgezim Gluten R5 test method has been evaluated and approved by the AOAC Research Institute Performance Tested MethodsSM Program for use with gluten free bread, oat flour and stainless steel surfaces, and has been assigned PTM Certification No. 052005.

SENSISpec Allergen Spike Solutions

Our SENSISpec Allergen Spiking Solutions can be used to produce positive control samples suitable for validation of all SENSISpec Allergen ELISA kits, such as determination of recovery rate in a spike/recovery assay and matrix interference in a linearity assay. **SENSISpec Spike Solutions are available for all allergen ELISA Kits.**

Automation Solutions

Gold Standard Diagnostics offers a broad menu of innovative, fully-automated, user friendly and compact instruments to simplify laboratory experience. These industry-leading instruments are the standard platforms for our ELISA-based food testing kits.

ELISA-processing robots: ThunderBolt® and The BOLT™

Fully automated ELISA analyzers with validated protocols for: Almond, Casein, Egg White, Gluten, Hazelnut, Lupin, Milk, Mustard, Peanut, Soy, β-Lactoglobulin

The BOLT™

1-plate ELISA Analyzer

- Intuitive User Interface
- Space Saving Device
- Low Consumable Costs
- High Precision Syringes
- Competitive Pricing

ThunderBolt®

2-plate ELISA Analyzer

- Intelligent Racks
- On-Board Camera
- Intuitive, Open, Flexible Software
- Built-in Reader
- High Precision Micro-Syringe

Compact microplate reader: GSD Absorbance 96

The most compact microplate reader for 96-well assays, compatible with all our ELISA plates. A highly robust device which delivers precise and accurate results whilst providing a maintenance-free user experience.
